# PROJECTS

## NOTES/LIST WEB APP | React.js

A web app made using React.js, and HTML/CSS for the frontend and Node.js, Express.js and, MongoDB for the backend. This app is similar to google keep where we can make and save lists and notes.
Features of this app :
- Multiple individual lists can be created and saved.
- Each list can have multiple entries which are saved in the database and can also be deleted.
- The app can be accessed from any device and has responsive design.

## BLOG WEBSITE | React.js

Made using React.js, and HTML/CSS for the frontend and Node.js, Express.js and, MongoDB for the backend, the blog website can be used to create and save blogs. Every blog can be accessed on its individual page using Express routing parameters.
Features of this app :
- Multiple individual blogs can be created and saved in the database.
- Each blog can have multiple long paragraphs which are saved in the database.
- The app has a home page where a list of all the blogs are displayed. On the home page, the contents of each blog is displayed in brief and has a 'read more' button to expand the contents.
- The app can be accessed from any device and has responsive design.

# CERTIFICATES

## The Complete Web Development Bootcamp | Udemy

Learnt about frontend development, backend development, REST APIs, ReactJS, MongoDB, JavaScript, jQuery.

## Cognizant Virtual Experience Program on Forage | Forage

Learnt about AGILE methodology in software development along with its advantages and disadvantages. Also, learnt about SCRUM technique.

## JP Morgan Virtual Experience Program on Forage | Forage

Learnt about AGILE methodology in software development along with its advantages and disadvantages. Also, learnt about SCRUM technique.
